

# Sample

---

サンプルです。

```
struct Article {
    let id: Int
    let title: String
    let content: String
}

class Model {
    private var articles: [Article]
    init(articles: [Article] = []) {
        self.articles = articles
    }
}

class ViewController: UIViewController {
    private let model: Model = Model()
}
```

# Content
