

Features

TODO: List what your package can do. Maybe include images, gifs, or videos.

Getting started

Usage

To use gramik package just access Gramik() widget and you will get full access of functionality.

```
import 'package:gramik/Home/ScreenHome.dart';
import 'package:flutter/material.dart';

class MyApp extends StatelessWidget {
  @override
  Widget build(BuildContext context) {
    return Scaffold(
      body: Gramik()
    );
  }
}
```
