

# Work with PDF in flutter

## Usage example:

```
void main() async {  
  try {  
    final document = await PdfDocument.openAsset('assets/sample.pdf');  
    final page = await document.getPage(1);  
    final pageImage = await page.render(  
      width: page.width,  
      height: page.height  
    );  
    await page.close();  
    runApp(  
      MaterialApp(  
        home: Scaffold(  
          body: Center(  
            child: Image(  
              image: MemoryImage(pageImage.bytes),  
            ),  
          ),  
        ),  
        color: Colors.white,  
      )  
    );  
  } on PlatformException catch (error) {  
    print(error);  
  }  
}
```
