

Notepad Button Description

Button introduction

When the phone is connected to the Notepad for the first time: the status light turns green, then press the button to pair

APP connection

Open the notepad or press the function button to start up. Status light blue light flashes after power on.

Starting up

Writing status

The status light turns green when writing

Editing

After the mobile phone is connected to the notepad, the status blue light changes from slow flashing to steady light, and the written content will be instantly transmitted to the mobile phone.

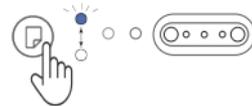

Offline Importing

After connecting the notepad, you can import offline files by pulling down the home page. The blue light flashes quickly when importing.

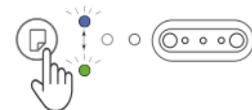

Create a Note

Each time you create a new note, you need to press the function button once. When the blue light flashes three times, it means that the new note is successful.

Reset

Press and hold for 10 seconds to reset. Clear all memory data and binding information on the notepad.

Restart

Press the Hidden restart hole firmly, the status light and the power light will light up at the same time to restart the notepad

*The notepad can be restarted when it crashes. This operation will not delete the data on the notepad.

Please pay attention to the regulations of the environmental agencies and other relevant departments on disposal regulations.

Packaging accessories

Smart Tablet *1 Passive Electromagnetic Pen*1 Manual*1
Charging Cable *1 Notebook *1 Spare Refill*1 Pencil Reader*1

※Refill replacement method

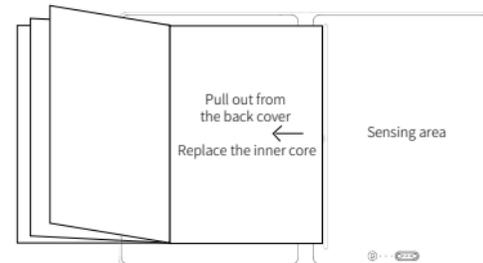

※No need to charge and adapt, you can use it when you turn it on.

※In order to sense the pressure value transmitted from the pen tip during writing, the pen tip will slightly retract when writing, which is normal.

※The ink in the refill will solidify in a low temperature environment, and it needs to be restored to normal temperature before it can be used normally.

※The charging cable is a dedicated magnetic charging cable that we independently developed. If you accidentally lose it, please go to the official website to buy it.

※The paper is replaceable and compatible with ordinary A5 paper; the right side is the sensing area, and writing outside the area will not be recorded.

Connection and pairing

This product needs to be used with 36notes app,after downloading 36notes app, you need to search for the notepad to connect in the app.Please ensure that the Bluetooth service and location service are turned on when searching, and give 36 corresponding APP permissions.

The first connection requires a button pairing operation, and the function button can be pressed after the green light flashes.

After logging in to the account, you can bind the device and make an automatic connection without having to press the button every time.

Each notepad can only be bound by one account. If other notepads need to be connected, the bound account should be untied or reset.
